```
BasicGame.MainMenu = function (game) { };
 2
 3
        var startButton;
 4
        var starfield;
 5
        var logo;
 6
7
    BasicGame.MainMenu.prototype = {
8
9
        create: function () {
10
11
                  We've already preloaded our assets, so let's kick right into
    the Main Menu itself.
                  Here all we're doing is playing some music and adding a
12
            //
    picture and button
13
                  Naturally I expect you to do something significantly
    better :)
14
15
            //Outputting sky, ship, score, lives, total and Start Time to the
    screen
16
            // The scrolling starfield background
            starfield = this.add.tileSprite(0, 0, 800, 600, 'starfield');
17
            logo = this.add.sprite((this.world.width / 2), (this.world.height /
18
     2) - 150, 'logo');
            logo.anchor.setTo(0.5,0.5);
19
            startButton = this.add.button((this.world.width / 2),
20
    (this.world.height / 2) + 50, 'startButton', this.startGame);
            startButton.anchor.setTo(0.5, 0.5);
21
22
        },
23
24
        update: function () {
25
                  Do some nice funky main menu effect here
26
        },
27
28
        startGame: function () {
29
                 And start the actual game
30
            this.game.state.start('Game');
31
        }
32
```

33

**}**;
